## Incredible 3 Year Performance

### 495.RC

Roundup Ready® Soybean Variety

### 4.9 RM

- Very High Yielding, SCN Resistant Force to be Reckoned With
- Shows **Consistency** in Both Loams and Clays
- Great Frog Eye and Stem Canker Tolerance
- 3 Years of Data Shows a **5.1 Bushel Edge Over the Competition**  
(Average of AG4903, P94B73, and NK S49-Q9)

Variety Characteristics*	
Plant Height	T
Plant Type	MB
Row Width	ALL
Standability	2.6
Flower Color	P
Pubescence	LT
Hilum Color	BL
Approximate seeds/lb	2950

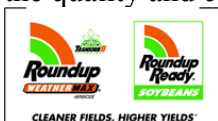

Disease and Pest Ratings*	
Phytophthora	1.5
Soybean Cyst Nematode	R3
Frogeye	1.0
Sudden Death Syndrome	3.1
Stem Canker	1.0
White Mold	2.0

\*1-5 rating with 1 being Excellent; R= resistant; MR= moderately resistant; S= susceptible; T= tolerant

## IT DOESN'T GET MUCH BETTER THAN THIS!!

The 3 year summary here tells it all. Over the past 3 years, Schillinger Seed 495.RC has out classed the field and done it in a big way. With a 4.8 bushel advantage over the Big 3 in Arkansas and a 5.4 bushel advantage over those same varieties in Mississippi, it's time to start cashing in on that huge income advantage per acre on your own farm. We're talking over **\$30\*** per acre income advantage. Don't leave that on the table with a cheaper seed products, put the quality and consistency of Schillinger Seed 495.RC to work in your fields this year and cash in next fall.
